Reverse Integrity Gaskets

Reverse Integrity Gaskets
for raised face flanges

KLINGER SENTRY RTJ

Reverse Integrity Gaskets

A safe, high integrity seal that provides operators with the ability to test the integrity of a bolted connection. The Sentry helps reduce the need to involve large volumes of nitrogen and reduce down time whilst performing integrity and pressure tests, maximising plant up time and efficiency.

APPLICATIONS

- » Designed to suit ASME B16.5, API 6A & API 17D Flanges
- » Subsea and Topside
- » Available as Octagonal, Oval, RX and BX cross-sections

ASSOCIATED EQUIPMENT & SERVICES

Sentry Test Plug

Sentry Test Pump

Gasket Insertion Tool
